EDUCATION

Wartburg College

Bachelor of Arts in Computer Science (GPA: 3.7/4.0)

Waverly, IA

Aug. 2025 – May 2028

- Honors & Certifications: Dean's List (2x)

North Iowa Area Community College

Associate's in Computer Science (GPA: 3.8/4.0)

Mason City, IA

Aug. 2024 – May 2025

- Honors & Certifications: President's List (2x), AMATYC Math Merit Award, TestOut Office Pro

EXPERIENCE

Software Development Intern

VGM Group, Inc.

May 2026 – Aug. 2026

Waterloo, IA

- Developed an AI-powered provider search feature that translated natural-language questions into Elasticsearch searches and prefiltered map links, simplifying provider lookups across 50K+ records.
- Built C#/.NET APIs and SQL Server stored procedures to traverse hierarchical data across 40 map categories, automating location-specific filtering and generating prefiltered map results from a single user query.
- Improved AI agent reliability by refining MCP tool routing and adding deterministic server-side safeguards when prompt-based controls were insufficient, reducing incorrect filters and tool selection.
- Secured service-to-service communication by migrating Elasticsearch credentials to Azure Key Vault and implementing Azure Managed Identity, eliminating locally stored secrets.

Information Technology Support Specialist

Zip's AW Direct

May 2024 – Apr. 2025

New Hampton, IA

- Resolved 10+ hardware/software issues weekly across staff and IT department requests
- Maintained office network infrastructure and system uptime
- Supported the marketing team by managing digital assets and resolving design-tool issues

UI/UX Design Intern

MVI Group GmbH

Jan. 2023 – Mar. 2023

Wolfsburg, Lower Saxony, Germany

- Designed Figma layouts for a manufacturing error-detection interface
- Built the primary interface used by the team to visualize AI model behavior

PROJECTS

End-to-End AI Digit Recognizer | *Python, TensorFlow, Streamlit, GitHub*

Sep. 2025 – Jan. 2026

- Trained a TensorFlow CNN achieving 98% accuracy on handwritten digit recognition
- Built and deployed a Streamlit web interface for real-time digit drawing and prediction
- Managed version control and deployment through GitHub

AI Research Agent | *Python, Streamlit, Llama 3.2*

Jan. 2026 – Mar. 2026

- Built a local AI research agent using Llama 3.2 to summarize web content without cloud dependency
- Optimized inference speed by benchmarking model sizes, selecting a 3B-parameter variant for real-time performance on consumer hardware
- Implemented automated PDF export of research results for shareable output

TECHNICAL SKILLS

Languages: Python, C#, TypeScript, JavaScript, SQL, Java, C++, Bicep, HTML/CSS, YAML, R, PHP

AI & Data: Large Language Models (LLM), Generative AI, Elasticsearch, TensorFlow, pandas, NumPy, Matplotlib

Cloud & Infrastructure: Azure DevOps, Azure Key Vault, Azure AI Foundry, Docker, CI/CD

Frameworks & Tools: .NET, Vue.js, Node.js, Streamlit, Git/GitHub, GitHub Copilot, Microsoft SQL Server (SSMS), Postman API, Visual Studio, VS Code, Figma

Concepts: System Architecture, API Development, Agile Methodologies
